Pinwheels of Good Fortune

Crafter level: Easy

What you'll need

- 3 sheets double-sided, heavy-weight patterned paper
- Scissors
- 3 bamboo skewers
- 3 craft jewels
- Hot glue gun and glue sticks or strong, fast-drying craft glue

How to make it

1. For the large pinwheels, cut 2, 6-inch squares from the patterned paper.

2. Cut diagonal lines from the corners of each square toward the center of each square, leaving about 1½ inch at each center uncut.

3. With the pattern of the paper facing up, gently pull the left corner point of 1 "triangle" to the center of the square and glue to secure. Repeat for the remaining 3 corner points.

4. With all 4 blades now secure, glue a craft jewel in the center of the pinwheel.

5. Glue the fat end of a bamboo skewer to the back of the pinwheel. Repeat steps 2 through 4 for the second large pinwheel.

6. For the smaller pinwheel, cut 1, 4-inch square from the patterned paper. Cut diagonal lines from the corners of the square to the center of the square, leaving about 1 inch at the center uncut. Repeat steps 3 through 5 for the smaller pinwheel.

7. Clean and dry the ends of the skewers. Insert all 3 skewers into your cake at varying heights and angles.
